Make life more beautiful™

COURSE OVERVIEW

This program is designed to provide participants with an interactive opportunity to learn and discuss advances in oncoplastic techniques and applications. The focus will be on breast reconstruction with in depth discussion on how to apply surgical techniques in complex scenarios to improve patient outcomes. A didactic morning session will be followed by a video and hands-on lab component.

SELECTION CRITERIA

This program is designed for general surgeons or surgeons who focus on breast and oncoplasty solutions interested in improving access for immediate and delayed breast reconstruction.

COURSE OBJECTIVES

At the conclusion of this program, participants should be able to:

- better understand principles for priming a conserving tissue for breast reconstruction
- able to manage and plan treatment through optimal patient selection and implant management during chemo and radiation therapy
- collaborate with Plastic Surgeons to achieve ideal outcomes and reduce complications

Mentor JJMP, is a unit of Johnson & Johnson Medical Products, a division of Johnson & Johnson, Inc.
